## CUSTOM TWIST LOCK SOCKET RAILS

You asked for it, we've got it.

- A custom rail built from customer suggestions.
- A simple " TWIST LOC ANVIL " feature allows the rail anvil to lock into sockets, extensions , adapters and/or swivel joints with ease and precision.
- Built with HIGH GRADE Neodymium Magnets sized to match the weight of the sockets which hold the rail in place and not drift , walk , slide or run down a vertical metal surface.
- The HIGH GRADE Neodymium Magnets allow the rails to stand up straight inside tool boxes eliminating tipping over.
- A custom padded EVA Foam base allows the rail to be placed on painted surfaces without fear of scratching and also equipped with anchor/hang holes.
- Removeable end caps for the addition or subtraction of the TWIST LOC ANVIL.
