

SHARE TECH PRO SERIES HAND TOOLS
**SAE/METRIC NON-SLIP COMBINATION SOCKET
DRIVER/EXTRACTOR SETS W/CUSTOM
TWIST LOK MAGNETIC BASE RAIL**

Simply put, they take the fear out of slippage and extraction.

- Heavy-duty impact grade chrome-moly tool steel construction allows for use with 18-volt impact ratchets/wrenches, air impact ratchets/wrenches, electric impact ratchets/wrenches and conventional manual chrome vanadium hand ratchets.
- The patented internal design allows for installing and extracting with the same driver/extractor.
- The 2 tools in 1 internal design allows for each socket to drive/install, remove/extract both SAE and its metric equivalent when applicable.
- No need for a separate SAE and metric set.
- Easily extracts rusted, corroded and rounded off hex head bolts, hex nuts, threaded rod, pipe nipples, socket head cap screws, hex lag screws and square head bolts.
- Delivers 30% more torque than DIN standards.
- Meets ANSI, BS and DIN requirements ASMEB107-5M-2002 (metric) and ASMEB107.2 (SAE)
