DESCRIPTION:
1/2" Drive Smooth
Operator Hand Ratchet

CODE: STT6001002
DESCRIPTION:
3/8" Drive Smooth
Operator Hand Ratchet

CODE: STT6001001
DESCRIPTION:
1/4" Drive Smooth
Operator Hand Ratchet

Only the "smoothest"
will do.

- A hand ratchet that flows freely in your hand while performing the "task at hand".
- Custom tapered handles with elevated center ridge lines allow for the perfect grip and anti-slip protection.
- A "smooth" 72-tooth gear design in the ratchet head provides for "smooth" travel and a 5 degree sweep in tight working environments.
- Reduced head design allows for use in tight, confined spaces.
- Heavy-duty one piece solid bar, chrome vanadium construction with a brushed finish for easy cleaning.
- The open hole design at the end of the ratchet handle allows for a wrist lanyard to be used in overhead or over water areas, wherever the fear of dropping the ratchet is of concern, and also for hanging on pegboards.
- The push key quick-release design on the ratchet head allows for a quick, easy transaction with sockets and extensions.
- A ratchet that is needed in all shops and crafts.
- Meets ANSI/ASME B107. 10M-1996
- Available in 1/4", 3/8" and 1/2" drives.
